Dagger
Co-Founder
March 2019 - Present (5 years 4 months)
San Francisco Bay Area

Docker, Inc
16 years 8 months

Co-Founder
November 2007 - Present (16 years 8 months)

DotCloud is a 2nd-generation platform-as-a-service. It makes it incredibly simple for developers to deploy and scale their applications, while at the same time delivering the flexibility and robustness required by critical business software. Developers can mix and match from a large choice of languages, databases, caching and messaging components, leaving them in full control of their technology stack.

CTO
July 2013 - January 2018 (4 years 7 months)
San Francisco, CA

CEO
November 2007 - July 2013 (5 years 9 months)

SmartJog
Solutions engineer
